Letter from the Director

Welcome to the May edition of our centre newsletter for 2019.

Continuing on with embracing sustainable practices within our centre, this month has seen the reconstruction of our centre vegetable garden. The children have been taking turns to help our vegetable patch grow and are eager to re-use our carrots, lettuce, onion and beetroot in our centre meals.

This month will also see our bush kindy change venue to Karrawatha Forest, as well as Swimming lessons starting at Lawrie Lawrence swim school at Beenleigh.

Reminder to all families: Our Mother's Day Afternoon Tea is this Friday at 3pm.

With lots of exciting events coming up, be sure to like our facebook page to see photos of your children engaging in all of this months, activities, events, and experiences.

Room News

Junior Early Years Room

The Junior Early Years room has had such a busy month! We would like to take the opportunity to welcome our new children and families into our room. We are so excited to have you all here and can't wait to see all the amazing things you will all learn and achieve this year.

Over the past month, our focus has been assisting the children to develop a sense of belonging into our room, extending on Easter, incorporating the Abecedarian Approach, developing the children's physical wellbeing and extending on language and literacy skills through story time. The children enjoyed developing their knowledge through various activities such as; Abecedarian Learning Games, science experiments, Easter activities and building social skills during group time.

Over the upcoming month we will continue to extend on the children's social skills and vocabulary, whilst also incorporating Mother's Day activities and Under the Sea experiences into our room.

Early Years Room

This month has been extremely busy and lots of fun! We have done a lot of gardening, where we all worked together to make our own Early Years garden beds, and provided children with the opportunities to plant their own veggies and flowers, as well as extend their knowledge about how things grow.

This month also saw us celebrating Easter by joining in our centre Easter Bonnet Parade! It was great to see the majority of our Early Years parents attend and join in the celebrations with our class and the rest of the centre, helping to connect as our own little community.

We are excited to see where next month takes us, with our focus at the beginning being all about mother's day, families and further establishing children's sense of belonging in our classroom.

Junior Early Years Room

Early Years Room

Pre-Prep

Pre-Prep children have started learning about letters and numbers since entering the second school term. Each week we focus on a different letter, where the children engage in various activities every day to help them recognise capital and lower case letters and identify the sounds each letter makes. They sing letter songs, read stories and engage in activities such as alphabet puzzles. We understand the importance of supporting our Pre-Prep children to get ready for school, therefore our play-based learning and interactions provide opportunities for encouraging skills in key learning areas such as literacy, numeracy and self help skills.

Our Pre-Prep class has started implementing the 3A approach (the abecedarian approach) by using Learning Games. Over the upcoming months, Children will have one-on-one time playing these Learning Games with Miss Yuxi. These games help to expand children's language and build better relationship with them which ultimately has a long-term impact on their school achievement. If you would like more information and /or if you are interested in playing these Learning Games with your child at home, please see me for your own "take home" copies

Schoolies Room

This month has seen our school aged children celebrate Easter, embracing sustainable practices by re-using old milk cartons to make Easter baskets. The schoolies shone at the Easter bonnet Parade, showing off their fantastic "Dapper" moves, really helping our younger children to have fun and embrace the spirit of the festivities.

The past few weeks the children have been focusing their energy on making mother's day gifts. They have engaged in conversations with each other about why their mums are the "Best Mums" talking about similarities and differences but most of all connecting on their love for their mothers.

End of this month we will be releasing the vacation care program, please let us know of any events that are coming up so we can work these into the program.

NATIONAL FAMILIES WEEK – MAY 15 - 21

The aim of National Families Week is to celebrate the vital role that families play in Australian society. The enduring theme '*Stronger families, stronger communities*', highlights the important role that families play

as the central building block of our communities and that community wellbeing is enhanced by family wellbeing. Find out more at www.nfw.org.au

NATIONAL SORRY DAY – MAY 26

National Sorry Day is an Australia-wide observance held on May 26 each year. This day gives people the chance to come together and share the steps towards healing for the Stolen Generations, their families and communities. www.reconciliation.org.au/national-sorry-day-an-important-part-of-healing/

Wholemeal Apple Muffins

PREP 15 min | COOK 12-15 min | MAKES 12

INGREDIENTS

- 1 cup (250 ml) yoghurt
- 3/4 cup (180 ml) vegetable oil (lightly flavoured olive oil or cold pressed macadamia nut oil are great choices)
- 2 eggs
- 1/2 cup (125 ml) maple syrup
- 1 teaspoon vanilla extract
- 1 cup (125 grams) plain wholemeal flour
- 1 cup (110 grams) almond meal
- 2 teaspoons baking powder
- 2 teaspoons cinnamon, ground
- 2 medium apples, skin on and diced plus an extra apple, thinly sliced

METHOD:

Preheat oven to 180 degrees Celsius (350F). Line a 12-hole muffin tin with muffin papers. Place the yoghurt, oil, eggs, maple syrup and vanilla extract into a large mixing bowl and whisk to combine. Add the flour, almond meal, baking powder and cinnamon and mix until just combined. Do not over mix. Gently fold through the diced apple. Use a 1/4 measuring cup to ladle the batter into the prepared tin and top each muffin with a slice of apple. Bake for 12-15 minutes or until golden and cooked. A skewer inserted should remove cleanly. Allow to cool slightly before removing the muffins from the tin and placing on a wire rack to cool completely. Enjoy x

Remember to always supervise kids in the kitchen.

APPS FOR ORGANISATION AND YOUR MIND.

OUR HOME

FAMILY | FREE

The year is well and truly underway now, everyone is busy and perhaps you have recognised it is time to get everyone on the same page.

Our Home is a new and simple way to organize your family. Kids will be motivated to do chores and take responsibility while parents can reward them for their effort. There's a shared grocery list and a family calendar to keep everyone coordinated.

BABY SNAP: DAILY PHOTO STORY

FAMILY | FREE

Snap a second of your child every day and get a movie of them growing!

Precious moments of childhood you will never forget. I love comparing photos and seeing how much my kids have changed, but scrolling through 17,000 photos is time consuming. This app makes it so easy and fun! Invite relatives to capture Snaps together. Discuss snaps in a family chat, private and secure.

STOP, BREATHE & THINK

ADULTS | FREE

Meditation & mindfulness to help you build the emotional strength and confidence to handle life's ups and downs.

Stop, Breathe & Think, the app for daily meditation & mindfulness, has a unique approach that allows you to check in with your emotions, and then recommends short, guided meditations, yoga and acupressure videos, tuned to how you feel.

FOCUS: Empathy and why we need to teach it to our children.

Why does empathy matter?

Empathy involves the ability to understand someone else's perspective and understand how they feel about it. Empathy is essential in interpersonal relations, has been linked to moral behaviour and in general, humans are kinder when they can understand one another's perspectives and emotions. Positive strengths in this skill have also been linked to emotional intelligence.

In a child, the skill of empathy advances as their cognitive structures develop. Between the ages of two and four years children start to become aware of their own emotions and feelings. Between five and seven years children start developing compassion and reading emotional cues from others. These stages of development are the foundations that help develop empathy in children. For some, the ability to feel empathy comes naturally. **Interestingly, it is not an innate deposition that unfolds equally in all children.**

Fortunately, parents can have a considerable influence to help develop empathy in children. If you encourage empathy, children can become more empathic to others. This is particularly important for children on the spectrum, children who lack 'theory of the mind' and for children who just naturally have a lower empathetic capacity than others.

- **What does empathy look like?** Decety and Cowell (2014) believe the word empathy has become a broad term for three distinct processes;
- **Emotional sharing:** which occurs when people experience unpleasant feelings because they saw or heard distress in another person.
- **Empathic concern:** which is a person's motive or desire to care for others who are vulnerable or experiencing distress.
- **Perspective-taking:** which is the ability to consciously put yourself in another person's situation and imagine what they could be thinking or feeling. All of which can be explored and encouraged through a child's early years.

10 Ways to Teach Your Child to Be More Empathetic

1. **Empathise with your child and show empathy towards others.** This is all about role modelling empathy and being mindful of your own responses to your child's emotions. The easiest way to do this is to be reflective of the emotions your child displays and validate how they are feeling.
2. **Teach children to effectively manage their emotions and self-regulate.** Expressing empathy is not always easy for children, particularly if they themselves are experiencing negative emotions or feelings that are overwhelming. One of the initial steps to developing empathy towards others is to be able to manage your own emotions effectively.
3. **Use every day opportunities to address perspective taking.** Use moments from everyday life to encourage caring and compassionate thoughts through 'perspective taking.' Talk openly about how another may feel when you identify situations that elicit an empathetic response in books, movies, at the park or in your home.
4. **Help children discover what they have in common with others.** Encourage inclusion, diversity and warmth by helping your child discover what they share in common with people of all different perspectives.
5. **Encourage kindness, thoughtfulness and compassion for all living creatures.** Prioritise these traits across all situations and to all living things.
6. **Help children develop the ability to read emotional cues.** Empathy requires children to identify how others feel, not only based on their own emotional insight but also on the other person's emotional cues – not every person reacts and feels the same in every situation.
7. **Develop cognitive awareness of empathy using literature.** While you are reading you can engage in empathy building by: discussing the character's feelings and emotions, pointing out the facial expressions or body language of characters, asking your child how they would feel if it were them.
8. **Engage in emotional awareness games and play.**
9. **Encourage younger children to develop empathic concern during imaginary play.** By engaging in play with your child you can role model and encourage empathetic concern.
10. **Encourage and praise emotional sharing.** Your child needs to be reassured that it is okay for them to experience both negative and positive emotions. They should also feel safe to express all emotions to you. You can encourage this by asking your child how they felt when they experienced a situation or event that might have produced a particularly strong empathetic response. When they do exhibit empathy, reinforce the behaviour by praising them for showing compassion. If your child shares an emotion with you, even an unpleasant one, make sure to tell them it is wonderful that they are sharing their emotions, and that it demonstrates how kind and caring they are.

I SPY... WITH MY LITTLE EYE

There are many different ways you can play I-spy. You might play using the first letter of the word, the colour and shape of the object or what you use it for. How you play will change depending on your child's age and how interested they are. **To extend the game you can take turns with your child, showing them different ways to ask questions.** I spy with my little eye something that is green, soft and found outside! Is it something we can eat? Can I roll on it?

HEALTH & SAFETY: Healthy Habits for Kids to Prevent Cold and Flu

While it's not possible to shield your kids completely from catching a cold or the flu, especially if they attend day care or school, you can teach them healthy habits to boost their immune systems and decrease their chances of picking up an infection. Teach your children these important healthy habits for kids to prevent colds and flu (and protect others when they are sick):

Get them into the hand washing habit:

Almost 22 million school days are missed due to the common cold alone, according to the Centres for Disease Control and Prevention. Studies have shown that hand washing can reduce absenteeism from infectious illness among school-aged kids. Hand washing is one of the most effective ways of preventing the spread of common school-age child illnesses such as cold, flu, pinkeye, and more. Since children spend so much time together in close quarters during the school year, it's a good idea to make sure hand washing becomes something they do automatically, as a matter of habit. Teach your child to wash his hands often, especially before eating, after blowing his nose, and after using the bathroom.

Teach Them How to Wash Their Hands Properly

Getting your child to go to the sink won't matter if she merely splashes her hands in the water for a second and calls it done. She should wash properly for at least 30 seconds with soap and water. Simple soap will do -- you don't need antibacterial products (in fact, studies have shown that antibacterial soaps are not any more effective at killing germs than regular soap, and health experts have expressed concern that increasing use of antibacterial products may, in fact, be giving rise to antibiotic-resistant bacteria).

Show Them How to Cough and Sneeze Properly

Cold and flu viruses can become airborne on droplets of saliva when someone sneezes or coughs. Teach your child to cover a sneeze or a cough with a tissue or with the inside of her elbow. A recent study showed that most people cover their sneezes, but do so with their hands (a bad habit that can spread the illness to others).

Tell Them to Avoid Touching Their Eyes

If your child touches something that someone with a cold has touched and then touches his eyes or mouth, the cold virus can enter his body through those points. Infections such as conjunctivitis can also be transmitted through touching eyes after touching an object that has been handled by someone with that infection.

Encourage Them Not to Share Utensils and Cups With Friends

Kids naturally love to share (well, sometimes...especially when it's not a favourite toy), but it's not a good idea to share eating utensils with friends, especially during cold and flu season. Viruses and bacteria are easily transmitted through saliva, so this is one type of sharing that you should teach your child to avoid.

In addition to these healthy habits, be sure to give your kids plenty of healthy and nutritious foods, which will help keep his immune system strong and ward off colds and flu. And make sure that he gets plenty of sleep, which is not only important for keeping him healthy but helps school-age kids focus in school and prevents crankiness and moodiness. Getting kids to go to bed can be a particular challenge for school-age kids, but it's important for his health as well as his emotional and cognitive well-being.

Sustainability CORNER

BE A PART OF THE PLASTIC FIGHT

With an annual production of more than 300 million tons, plastic is one of the most widely used materials in the world.

What often escapes one's attention is that the plastic is used for its main purpose for only a moment compared with its lifecycle of 20 to 500 years. Lightweight and designed to last, the discarded pieces are easily transported to ecosystems through the forces of nature

causing serious threats to migratory species around the world.

Have you ever found a bird's nest where a part of it was made up of plastic? If you could make one change this month in a move towards more sustainable living we encourage you to stop using single use plastic. If everyone made this one small change the we could protect species for the future. Without change habitats will continue to deteriorate and become inhabitable.

SLEEP/NAP TIME

Sleep is important for all of us because it's a time for rest and recovery, allows our brains to form new pathways and is a chance to replace chemicals and repair muscles. Because young children grow and develop so quickly, they need much more sleep—including daytime sleep—than adults.

Naptime is not only important for regaining energy, it's also beneficial for brain development in young children. Several studies have shown that napping allows for improved cognition and memory development.

In fact, one study had preschool children play the game "Memory" either after a nap or after quiet playtime. The children who napped showed better recall than those who did not.

What if my child no longer has naps? Children who do not wish to sleep are provided with alternative quiet activities and experiences, while those children who do wish to sleep are allowed to do so, without being disrupted. If a child requests a rest, or if they are showing clear signs of tiredness, regardless of the time of day we provide them with a comfortable, safe area they can rest in.

BUSH KINDY GOES TO KAWAWATHA FOREST

As part of our kindergarten program our centre offers all children the unique experience to participate in our Nature Explorers program.

This educational program has proven to have many benefits to children's learning such as Increased confidence, motivation and concentration, increased social, physical and language skills, deeper conceptual understandings and respect for the natural environment as well as more varied risk-taking behaviours and positive dispositions towards risk and challenge.

This term, we are excited to see our Kindergarten children explore the walking tracks and trails of Karawatha Forest. They had so much adventure and purposeful meaning to new learnings from last Term's explorations of Eden's Landings Pathways, we are all very excited to be apart of this terms learning journey.

Short simple activities to get some active minutes in the day.

Next time you are at the playground don't just sit back and watch the kids have all the fun! Join in too. Your children will love having you play along and climbing, crawling, hanging and sliding all increase the heart rate.

See how many slides you can all have in a minute? Who can cross the monkey bars? Who can swing the highest?
